## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see page 1, filed 1/3/05, with respect to independent claims 1, 7,8,and 13 have been fully considered and are persuasive. The rejection of claims 1-4, 7-10,12 and 13 has been withdrawn.

### ***Allowable Subject Matter***

2. Claims 1-20 is allowed.

3. The following is an examiner's statement of reasons for allowance: Regarding claims 1, 7,8,13, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which at least include an apparatus and method for producing a solid state imager comprising a single continuous thin film as a passivation section as claimed. Regarding claims 5 and 14, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which at least include forming a single, continuous thin film used for forming the passivation section on the light shielding section and the aperture; and flattening a surface of the single continuous thin film to form the passivation section by chemical machine polishing as claimed.

Art Unit: 2873

Regarding claim 6, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which include a method for producing a solid state imaging device where flattening of the passivation section is performed under the condition that a selective ration of 1:1 implemented as claimed.

Regarding claim 15, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which at least include a planarization section overlying the substantially flat top surface of said passivation section, wherein the planarization section has a refractive index smaller than the refractive index of the passivation section, wherein a selection ratio of the planarization section to the passivation section is about 1: 1 as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
